**Association of Paclitaxel-Induced
Peripheral Neuropathy with ABCB1
Gene Single Nucleotide
Polymorphisms in Patients with
Breast Cancer
Thesis**

Submitted in Fulfillment of the Requirements for the

Master's Degree

In Pharmaceutical Sciences

Clinical Pharmacy

By

Nabil Mahmoud Abdelfattah Abdallah

Bachelor of Pharmaceutical Sciences, 2012

Faculty of Pharmacy, Ain Shams University

2021

Microbiology & Immunology dept.

**Association of Paclitaxel-Induced Peripheral Neuropathy
with ABCB1 Gene Single Nucleotide Polymorphisms in
Patients with Breast Cancer
Thesis**

Submitted in Fulfillment of the Requirements for the

Masters' degree
In Pharmaceutical Sciences
(**Clinical Pharmacy**)

By

Nabil Mahmoud Abdelfattah Abdallah
Bachelor of Pharmaceutical Sciences, 2012
Faculty of Pharmacy, Ain Shams University

Under Supervision of
Prof. Nagwa Ali Sabri
Professor of Clinical Pharmacy Department
Faculty of Pharmacy
Ain Shams University

Prof. Yasser Ibrahim Hassan El Nahass
Professor of Clinical Pathology
National Cancer Institute
Cairo University

Dr. Mohamed Hassan Mohamed Solayman
Lecturer of Clinical Pharmacy
Faculty of Pharmacy
Ain Shams University

2021

Acknowledgments

First, I thank "**Allah**" for granting me the power to accomplish this work.

I would like to express my deepest thanks to **Prof. Nagwa Ali Sabri**, Professor of Clinical Pharmacy, Faculty of Pharmacy, Ain Shams University, for her valuable scientific supervision, constructive advice, writing and revising the thesis and continuous guidance throughout the work.

My deepest gratitude and appreciation are expressed to **Prof. Yasser Ibrahim Hassan El Nahass**, Professor of Clinical Pathology, National Cancer Institute, Cairo University, for his support and for kindly supplying the laboratory facilities whenever needed. His constructive criticism guided me immensely throughout the work and during the revision of the thesis.

I am also greatly indebted to **Dr. Mohamed Hassan Solayman**, Lecturer of Clinical Pharmacy, Faculty of Pharmacy, Ain Shams University, for suggesting the research topic and for providing guidance throughout the genetics part of this study.

I would also like to thank my dear **colleagues** and all the **workers** at the Faculty of Pharmacy, Ain Shams University for their help and support during this work. Besides, I would like to thank all the **oncology residents and nurses** at Nasser's Institute Hospital, for their help during the collection of specimens, and to **patients** for their valued cooperation and patience during the follow-up duration.

Finally, my deepest everlasting thanks and appreciation are for my beloved **parents** for their continuous support and encouragement throughout my life.

والحمد لله رب العالمين.....

Nabil Mahmoud Abdelfattah

List of Contents

Title	Page No.
List of Tables	i
List of Figures.....	ii
List of Abbreviations	iii
Introduction.....	6
Paclitaxel Adverse Toxicities and Novel Delivery Strategies:	9
Peripheral Neuropathy: A Persisting Challenge in Paclitaxel-Based Regimes	20
<i>ABCB1</i> (P-glycoprotein) and the Clinical Pharmacology of Adverse Drug Reactions	29
Aim of the Study.....	45
Patients and Methods.....	46
Results	64
Discussion.....	76
Summary.....	83
Conclusion	84
Recommendations	85
References.....	86

List of Tables

Table Number	Title	Page Number
Table 1:	Paclitaxel-induced peripheral neuropathy assessment score.....	27
Table 2:	GeneJET whole blood genomic DNA Purification Mini Kit components.....	48
Table 3:	The correlation between sequences in the sample and fluorescence signals:	55
Table 4:	Step temperature and cycle duration:	58
Table 5:	Chemotherapy-induced peripheral neurotoxicity-related terms and Grading (As reported in the National Cancer Institute Common Toxicity Criteria version 5.0).....	61
Table 6:	Characteristics of the study group.....	65
Table 7:	Disease-specific characteristics of the study group.....	66
Table 8:	Allele and genotype frequencies for G1236A (rs1128503) and G3435A (rs1045642):	67
Table 9:	The association between each covariate and paclitaxel-induced peripheral neuropathy grade:.....	70
Table 10:	Comparison of genotypic models for paclitaxel-induced peripheral neuropathy prediction:.....	72

List of Figures

Figure Number	Title	Page Number
Figure 1:	Chemical structure of paclitaxel	9
Figure 2:	A model of paclitaxel-induced peripheral neuropathy	21
Figure 3:	Transport and metabolism of paclitaxel	42
Figure 4:	Overview of the gDNA extraction process	52
Figure 5:	5' nuclease assay	55
Figure 6:	Allelic discrimination plot example	59
Figure 7:	Schematic diagram showing the genotyping process	60
Figure 8:	Association between (A) Diabetes status before therapy, (B) Menopausal status, (C) G1236A genotype, (D) G3435A genotype, and PIPN grade	69
Figure 9:	Receiver operating characteristics (ROC) curve for model evaluation	73
Figure 10:	Predictive performance of the additive model	74
Figure 11:	Association between (A) Age, (B) Body-mass index, (C) Body surface area, and Paclitaxel-induced peripheral neuropathy grade	75
